BUSINESS: Latlongglobal.com:

- We design customer tailored standardized SIM Training Footprints/Profiles for all Training accessible in **real-time EXCEL** format synchronized through WIFI with a secure server
- These synchronized i-Pad files are meant to be used prior to a day's SIM session for studying for both clients and IP and then for Briefing room, SIM and De-Briefing use
- We also e-format all Training forms to be filled out in real time from the i-Pad synchronized to a secure server using Smartsheet technology for immediate access to authorized personnel...paperless world except for Flight Plans and Load sheets
- We also are to first company to develop the RNAV approach in 1990 and continue to create FMC Line Selectable Approaches to any airport worldwide (Circling to Land)
